

RECENT PCT PATENT PUBLICATIONS ON COVID 19

Dates: 20th July 2020 to 6th August 2020

While the world is trying to combat with the Novel Coronavirus, it is reassuring to see many innovators coming up with various solutions. Here, we present snapshots from some recent PCT publications relating to therapeutics.

Publication No

IN202011016345

Title

Method For Treatment Of SARS-COV2 (COVID19) Infection Using ACE2 Inhibitor

Summary

A method for treating SARS-CoV2 (COVID19) using therapeutically effective amount of an ACE2 inhibitor (S,S)-2-(1-Carboxy-2-(3-(3,5-dichlorobenzyl)-3H-imidazol-4-yl)-ethylamino)-4-methylpentanoic acid.

Publication No

WO2020143892

Title

Probiotic Which Cures COVID 19 Patients By Transfer Of Natural Passive Immunity From Immunised Cows

Summary

The invention relates to a technique for the transfer of natural passive immunity via the colostrum of gestating cows infected with SARS-COV-2. This colostrum is a natural probiotic of the immunised cow having circulating anti-SARS-COV-2 antibodies which is curative and preventive for patients infected with COVID19 and healthy patients.
